Height:	ca. 1.230 mm
Area of application:	480 mm x 300 mm,
Weight:	approximately 110 kg
Electricity:	Current: 400 V / 16 A
Tank capacity:	50 l

Professional Model

up to 2,800 glasses each hour

Ideal for:

- cultural festivals
- Festivals
- significant occurrences
- Event technology firms

TECHNICAL SPECIFICATIONS

Long:	ca. 2,200 mm
Height:	ca. 1,230 mm
Usable dimensions:	690 mm x 300 mm
Weight:	approximately: 140 kg
Electricity:	Current: 400 V / 32 A
Tank capacity:	100 l

- Cleaning of beer mugs, wine glasses, and drinking glasses in containers or baskets.
- Hot cleaning at temperatures up to 70 °C for the efficient elimination of beverage residue, grease, and dirt.
- A cold rinse ensues—glasses emerge from the system prepared for service and chilled.
- Ideal for serving beer and wine, as beverages can be presented in chilled glasses.
- Continuous cleaning system for uninterrupted maintenance during operation.
- Frequency converter for adjusting belt speed to enhance the cleaning process.

- UV disinfection system for minimizing pathogens in tank water
- Durable industrial construction for ongoing utilization
- Food-grade conveyor belts and materials
- Automated dispensing of cleaning agents
- User-friendly operation and minimal maintenance technology
